### SMS Advisory:

• If Blast disease was observed in Paddy. To control, spray Tricyclazole @ 0.6 g or Isoprothaiolane @ 1.5 ml or Kasugamycin @ 2.5 ml per litre of water twice at 10-15 days of interval.

### Crop Specific Advisory:

Crop(Varieties)	Crop Specific Advisory
RICE	• Prevailing weather conditions are congenial for the infestation of Stem Borer to control, spray cartaphydrochloride @ 2 g per litre of water. • Due to prevailing weather conditions and high amount of irrigation water in the field, Stem rot disease is observed in paddy ,To control spray Propiconazole @ 1.0 ml per litre of water.

Crop(Varieties)	Crop Specific Advisory
CASTOR	<ul style="list-style-type: none"> <li>To control Tobacco caterpillar in castor, o Install 4-5 Pheromone traps per acre to monitor the Tobacco caterpillar. o Initially spray Monochrotophos @ 2 ml or Novaluron @ 1 ml per litre of water.</li> <li>Prevailing weather conditions like high temperatures may leads to infestation of Green hoppers and Thrips. To control spray Acephate @ 1.5 g or Acetamiprid @ 0.3 g or Imidacloprid @ 0.3 ml or Profenophos @ 2 ml per litre of water.</li> <li>If capsule borer is observed in castor, to control spray Profenophos @ 2 ml or Novaluron @ 1 ml per litre of water.</li> </ul>
MAIZE	<ul style="list-style-type: none"> <li>To control Fall Army Worm in maize, o Install 6-10 Pheromone traps per acre to monitor Fall Army Worm incidence. o To control Fall Army Worm poison baiting with Thiodicarb (mix 10kg rice bran + 2 kg jaggery + 2-3 liters of water; keep the mixture for 24 hours to ferment and add 100 g Thiodicarb just half an hour before the application in the field). The bait application should be done into the whorl of the plant. o Spray Eamectin benzoate @ 0.4 g or Thiamethoxam 9.5% + Lambda cyhalothrin 12.6% - 0.5 ml or Chlorantraniliprole @ 0.3 ml per litre of water.</li> </ul>
CHICK PEA	<ul style="list-style-type: none"> <li>Dry root rot is noticed in chickpea to avoid this give irrigation to the crop during dry period.</li> </ul>
TOMATO	<ul style="list-style-type: none"> <li>In Tomato, Water melon, Cucumber, Musk melon and Gourds due to high temperatures in summer Ca and B deficiency may occur during fruit development stage so, spray twice with Boron @ 2g and Calcium Nitrate @ 5 g per litre of water at 7-10 days interval.</li> <li>To control Spodoptera in vegetable crops spray Novaluron @ 1.25 ml per litre of water.</li> </ul>
OKRA/ LADIES' FINGER	<ul style="list-style-type: none"> <li>Green leaf hopper acts as a host to spread of viral diseases in Bhendi. So, to control spray twice with Neem oil (Azadiractin)1500 ppm @ 5 ml or Fipronil @ 2 ml or Acetamiprid @ 0.25 g.</li> </ul>

#### Horticulture Specific Advisory:

Horticulture(Varieties)	Horticulture Specific Advisory
BRINJAL	<ul style="list-style-type: none"> <li>Incidence of Shoot and Fruit borer is noticed in Brinjal. o Install 4 Pheromone traps per acre to monitor the fruit and shoot borer. o Clip the infested shoots and destroy. o Spray Chlorantraniliprole @ 0.3 ml or Eamectin benzoate @ 0.4 g per litre of water.</li> </ul>
ONION	<ul style="list-style-type: none"> <li>15 day before pulling of onion crop spray Carbendazim @1 g per litre of water and also stop irrigation.</li> </ul>
CHILLI	<ul style="list-style-type: none"> <li>To control Thrips and Mites spray Diafenthuron @ 1.5 g per litre of water.</li> </ul>
MANGO	<ul style="list-style-type: none"> <li>For proper fruit development in mango spray 13-0-45 (Potassium Nitrate) @ 10g per litre of water.</li> <li>Fruit borer damage was observed in Mango. To control spray Chlorpyriphos @ 2.5 ml or Lambda cyhalothrin @ 1 ml + Neem oil (1500 ppm) 2.5 ml per litre of water.</li> </ul>
BITTER GOURD	<ul style="list-style-type: none"> <li>Incidence of Fruit Fly is noticed in Bitter gourd, Ridge gourd, Coccinia, Water melon and Musk melon. To control, install Pheromone traps 10-12 per acre, spray Malathion @ 2 ml per litre of water. Application of Poison bait that is mixture of 100 ml Malathion and 100 g Sugar or Jaggery in 10 litres of water @ 10-12 bowls randomly across the field to attract the mother fruit flies.</li> <li>To control Powdery mildew in Ridge gourd, Bitter gourd, Bottle gourd and Sneak gourd, spray Mancozeb @ 2.5g or Metalaxyl @ 2 g per litre of water.</li> <li>To increase female flowers in Gourds, spray twice with Borax @ 3 g. per litre of water or Etharyl @2.5 ml per 10 litres of water in 7 days interval.</li> <li>Due to high temperatures there may chances for incidence of Thrips in gourds. To control spray Imidacloprid @0.3 ml or Eamectin benzoate @ 0.4 g. or Spinosad 0.3 ml per litre of water.</li> </ul>
